Professional Summary

Full Stack Developer with hands-on experience building production web applications using **Python, Flask, Node.js, React.js, and MongoDB**. Skilled in designing REST APIs, secure authentication workflows, and role-based access systems, with a track record of shipping features across the full stack – from database schema to UI. Seeking a Backend, Python, or Full Stack Developer role where I can build scalable, well-tested applications.

Technical Skills

Programming Languages: Python, JavaScript (ES6+), SQL

Backend Development: Flask, Node.js, Express.js, REST API Design, Middleware, JWT Authentication, Role-Based Access Control (RBAC), CRUD Operations, Error Handling

Frontend Development: React.js, React Hooks, Context API, React Router, Component Architecture, Responsive Design

Databases: MongoDB, MySQL, SQLite

Tools & Technologies: Git, GitHub, Postman, VS Code, npm, Chrome DevTools, Vercel, Linux, Ubuntu

Development Practices: API Testing, Debugging, Code Review, Agile Development, Frontend-Backend Integration

Professional Experience

Full Stack Developer Intern

Jan 2026 – Present

Thinkinfo Expert Solutions Pvt. Ltd.

Salem, Tamil Nadu

- Built and shipped **5+ features** across **3 production web applications** using React.js, Node.js, Express.js, and MongoDB, integrating frontend and backend for core business workflows.
- Designed and secured **10+ REST API endpoints** with JWT-based authentication and role-based access control, reducing unauthorized-access issues and standardizing error handling across modules.
- Implemented business logic and database operations in MongoDB, resolving **20+ bugs** through debugging and code review, while collaborating on a Git/GitHub-based team workflow.

Projects

Human Resource Management System (HRMS)

2026

Node.js, Express.js, MongoDB, React.js, JavaScript, JWT

- Built a full-stack HRMS platform with **4 role-based modules** (CEO, Manager, Employee, Intern) covering employee management, attendance, leave, department, and finance operations.
- Designed **15+ REST API endpoints** with JWT authentication and role-based authorization, enforcing secure, module-level access for each user type.
- Automated attendance tracking and working-hours calculation, cutting manual attendance processing effort by an estimated **40%** versus a spreadsheet-based workflow.

Automatic Question Paper Generation System [\[Live Demo\]](#)

2026

Python, Flask, React.js, MongoDB, REST API, AI/LLM

- Built a full-stack platform that generates exam papers from syllabus and study material inputs, cutting manual question-paper drafting time by an estimated **50%**.
- Developed **8+ REST API endpoints** for syllabus management, question generation, paper creation, authentication, and paper history, with role-based access control.
- Integrated AI/LLM-based question generation with configurable difficulty distribution and marks allocation, supporting automated creation of **multiple question categories** per paper.

Education

Muthayammal Engineering College, Tamil Nadu

2022 – 2026

B.Tech. Artificial Intelligence and Data Science, CGPA: **8.17/10**
